- 1.2. Check compatibility of vehicle and accessories

### **2. Connection schema**

### **3. Installation**

### **4. Technical support**

## **Legal Information**

Changes/updates of the vehicle's software can cause malfunctions of the interface. We offer free software-updates for our interfaces for one year after purchase. To receive a free update, the interface must be sent in at own cost. Labor cost for and other expenses involved with the software-updates will not be refunded.

## 1. Prior to installation

Read the manual prior to installation. Technical knowledge is necessary for installation. The place of installation must be free of moisture and away from heat sources.

### 1.1. Delivery contents

*Take down the SW-version and HW-version of the interface boxes, and store this manual for support purposes.*

### 1.2. Check compatibility of vehicle and accessories

#### Requirements

<i>Vehicle</i>	VW, Skoda, Seat
<i>Navigation</i>	VW RNS315/510, RCD510 and Skoda/Seat identical in the same way <b>with factory rear-view camera version LOW (without camera control box - fixed guide-lines only)</b>
<b>Limitations</b>	
<i>After-market device</i>	A NTSC-compatible CVBS input must be available
<i>Factory rear-view cam</i>	Must NOT be version HIGH

## 2. Connection schema

\*If the blue wire is connected to +12V/ACC or antenna remote the GPS signal of the navigation could be disturbed.

## 3. Installation

**Switch off ignition and disconnect the vehicle's battery! If according to factory rules disconnecting the battery has to be avoided, it is usually sufficient to put the vehicle in sleep-mode. In case the sleep-mode does not show success, disconnect the battery with a resistor lead.**

Place of installation is on rear of the head-unit.

## 4. Technical support
